High Score for Genius Pack's High Altitude Flight Bag

February 20, 2018 - by Melody Wren

It is a

nuisance to reach up into the overhead compartment or under the seat in front of you every time you want something from your bag. I always envy other passengers who travel lightly and seem to have everything at hand easily. I used to use a tote bag on wheels to bring everything I needed on the plane, but now as the seats seem to be shrinking, there is rarely space under my seat for it, and I am too short to use the overhead compartment comfortably.

Genius Pack has the answer to address many of these issues. In one hand, I can carry everything I need, wrap it over the seat in front as I board, and pull it off, with everything intact.

Recently, surfaces on an airplane were tested for germs and the seat pocket was found to be one of the worst areas. By carrying the Genius Pack, we won't come into contact with the germ-laden seat pocket as it wraps

around the plane seat in front of you.

Similar to a knap sack, this sleek tote gets packed with everything you need for a flight to carry through the airport. Pockets for phone, tablet, charger, headphones, and reading materials, the designated compartments are labeled to help you get and stay organized. When you land, you grab it and don't have to worry that you have left something behind.

It comes with removable shoulder straps, an audio port, and a five year warranty.

Colours include red, black, navy or titanium and start at \$75.00 CDN.
