summer left to make more summer memories, spending as much time as possible at a good beach is a great time to spend those last precious days. Recently I was at different beaches three days in a row, but I really wish I had used the Swim Guide app before I swam at one of them because everyone in the family developed swimmer's itch right after our dip.

The Swim Guide does everything except what to pack for your picnic lunch at the beach.

Swim Guide helps find swimmable water simple and easy to know the water quality at your beach.

The swim guide can go wherever you go, and its free. Beach hunt everywhere you travel and the swim guide does the rest. Finding the right match of beach for you and your family is made easier with the swim guide.

It's the only charity app of its kind, providing you with current recreation water quality information, every beach marked with a green or red icon .

Explore the best beaches in Canada, The U.S., Mexico, New Zealand, Australia and Bahamas . With 7,000 freshwater and marine beaches and swimming locations on the app and website, it makes finding clean, swimmable water simple.
