Staying warm and fashionable in the winter can be a little difficult at times. Luckily, there are so many amazing winter accessories that pair fashion with function for our cool climate, whether at home or when travelling. I simply can't live without one essential in particular and that's the perfect winter hat. There are many to choose from simple, slouchy toques in soft cashmere to fleece functional hats with ear flaps. I prefer neutral colours such as black, grey or cream because they pair well with just about any outfit and add a chic touch in the chilliest weather.

A river cruise in Europe in the fall or winter deserves a more fashionable piece and Ambler doesn't disappoint with this Celtic Beanie, warm, and hand-knitted with buttons adding that bit of chic. Available in three colours.
